Subject:

PETITION FOR ESTIMATED REVENUE REQUIREMENT FY 2016-17

Dear Sir.

SSGC's Estimated Revenue Requirement (ERR) Petition for FY 2016-17 as required under Section 8(1) of OGRA Ordinance 2002 and Rule 4(2) of Natural Gas Tariff Rules 2002 is enclosed for the Authority's consideration and necessary approval. SSGC through its letter reference RA/21/17 dated 4 March 2016 has requested the Authority to extend the submission date of the Petition for Estimated Revenue Requirement for FY 2016-17 till 15 March 2016.

An increase of Rs. 6,800 million (Rs 17.42 per MMBTU) in SSGC's prescribed prices for FY 2016-17 has been estimated/ worked-out, in order to meet the projected revenue requirement for the year under review.

In the instant petition Meter Manufacturing Profit, Late Payment Surcharge and income from Sale of Condensate have been treated as non-operating incomes in line with Authority's principle decision taken in determination dated 24 September 2010 on the Company's Final Revenue Requirement for FY 2009-10. Similarly, the treatment of income from sale of LPG and NGL/gas condensate extracted from various fields' gases have been treated as non-operating incomes.

The gas demand and supply gap is continuously increasing in the country. To mitigate the gap GOP is working on various options as communicated through letter No. NG-(II)-16(I)/14-Misc-LNG dated 5 November 2014. As one of the solutions LNG Imports has been started. A brief on recent developments on LNG front along with the infrastructure requirement etc. are outlined in Annexure-D / Section D of the Petition.

The matter of RLNG pricing, is under review of the Authority Since the Company has filed review petition on 19 October 2015 seeking Authority's review on its determination dated: 7 October 2015. Authority is requested to consider the submissions made by the Company in the petition and during the Public Hearings held on 28 December 2015 and 4 January 2016 in Karachi and Lahore respectively and determine the revised RLNG price incorporating actual LSA charges including retainage as per the terms of LSA, cost of service, SSGC's administrative margin.

SSGC House Or Shah Sujeman Road, Guishan-e-Iqbal, P.O. Box 17989 Karachi-75300 PABX Telephone 9221000, Fax 92-21-99231550 Website: www.ssgc.com.pk In its decision on estimated revenue requirement for FY 2015-16. OGRA not allowed the return on assets related to RLNG infrastructure advising to finance these assets from GIDC. However, the Ministry of Finance subsequently clarified that GIDC act allows the Federal Government to decide about the utilization of GIDC, hence FG has decided not to utilize GIDC for RLNG projects advising that its financing may be arranged through commercial banks as per earlier decision of ECC.

All the costs related to LNG/RLNG business (including the LSA and other charges) are to be ring-fenced and recovered from RLNG customers. Besides above as per the recent decision of ECC, financial cost incurred in creation of RLNG infrastructure has been allowed as admissible expense in the revenue requirement of the utility companies. Estimates for FY 2016-17 related to RLNG business are therefore outlined separately under attachment I of Annexure-D

The application form on the prescribed format is enclosed along-with the following supporting statements/ schedules:

Section-A: Tariff working and Financial Statements

Section-B: Supporting schedules to Financial Statements

Section-C: Tariff workings, Financial Statements & Other Schedules (As per

OGRA formats).

Section-D: Project details / addition to the Fixed Operating Assets (Rate Base).

Section-E: Details of Transmission & Distribution Cost.

The filing fee of Rs.1.000,000/ (Rupees one million only) is being paid through enclosed demand draft # 101594163 dated: 30 Nov 2015.

It is submitted that SSGC's various petitions are under consideration of the Authority, list of these Petitions is given in schedule-I.

We would therefore request the Authority to approve a price increase of Rs. 17.42 per MMBTU w.e.f. 1 July 2016 in SSGC's tariff for FY 2016-17, please

Yours faithfully,

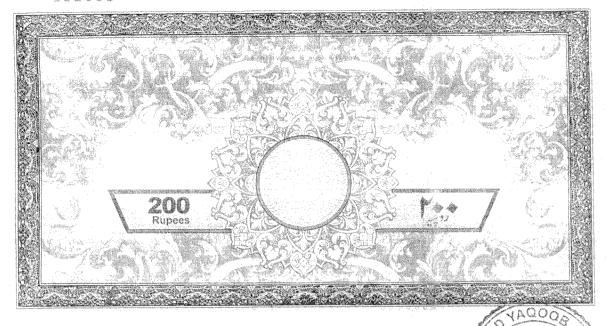

Syed Fasihuddin Fawad General Manager (RA) (For Managing Director)

CC: Mr. Shehzad Iqbal, Executive Director (Gas) OGRA Ms. Misbah Yaqub, Executive Director (Finance) OGRA

Note:-

- Upward adjustment of Rs 17.42 per MMBTU for FY 2016-17 has been re-worked at Rs 23.45 per MMBTU with the consideration that effect of price adjustment not to pass on to domestic, special commercial (roti tandoors) customers and feedstock of fertilizer industry.
- Minimum charges as per consumer price notifications dated 1 September 2015 issued by the Authority.

-2

BASIS & ASSUMPTIONS OF PETITION FOR ESTIMATED REVENUE REQUIREMENT (ERR) FOR FY 2016-17

A) Tariff

Projected gas Sales Revenue for FY 2016-17 is based on Consumers' prices as per notifications dated 31 August 2015 and 1 September 2015 whereas SSGC prescribed (Retainable) prices have been taken as per Annexure-B of OGRA Determination of Estimated Revenue Requirement of SSGCL for FY 2015-16 OGRA-6(2)-2(5)/2014 dated 18 December 2015.

B) Non-operating incomes

In line with OGRA principal decision under determination on Company's Final Revenue Requirement for FY 2009-10 dated 15 September 2010, and subsequent Stay Orders granted by High Court of Sindh in respect of FY 2010-11, FY 2011-12, FY 2012-13, FY 2013-14 and FY 2014-15 revenue from Meter Manufacturing Profit, Late Payment Surcharge and Sale of Condensate are treated as non-operating income in the instant petition.

Revenue from Sale of LPG / NGL:

SSGC is selling Liquefied Petroleum Gas (LPG) extracted from the Kunnar Pasakhi/ Bobi / Sinjhoro /Niamat Basal Field gases utilising the extraction facility of JJVL under an interim arrangement with JJVL to process and extract LPG and NGL from the gas being delivered from these Gas Fields. The charges taken for processing of LPG / NGL are US\$ 235 per MT which is used in the estimates.

Consequent upon Honourable Supreme Court of Pakistan's decision dated 4 December 2013, similar interim arrangements as referred above have now been made for LPG/NGL extracted from Badin gas at JJVL.

Certain incomes which the Company derives from its operations over and above those for which it has been granted a license by OGRA cannot be counted as its "operating" or "regulated" income and therefore these incomes cannot be subjected to the tariff determination process. The license granted to SSGC is for "operations" in the areas of transmission, distribution and sale of natural gas and these are the total "regulated activities" for the purposes of the license.

It is stated that LPG is recognized as a fuel distinct from natural gas, both as per its chemical formula and as per the law. As a consequence of this, any income derived from LPG by SSGC cannot be treated as operating income by OGRA for the purposes of tariff determination. SSGC's above point of view has been endorsed by the Honorable Sindh High Court by suspending the relevant paragraphs of OGRA's decision on determination of FRR FY 2012-13 dated: 5 November 2015 and determination of FRR FY

~ h

2013-14 dated: 6 Nov 2015 wherein the Authority treated sale of LPG and NGL as operating income of the Company.

Notwithstanding to the fact that OGRA has so far not implemented the orders of the Hon'able High Court and SSGC was constrained to file applications for enforcement and execution of 20 Nov 2015 orders, keeping in view of such clear and self-speaking orders of the Hon'able Sindh High Court, the income from sale of LPG/NGL has been taken as non-operating income(s).

C) RLNG

On the initiatives of the GOP, the import of LNG is being made on a fast track basis. First LNG terminal has been operational since March 2015.

The project is basically divided into the following major components:

(i) LNG supply (ii) Re-gasification (iii) Gas distribution

An agreement between SSGCL & Engro Elengy Terminal Limited (EETL) has been signed on 30 April 2014 for storage and re-gasification of LNG. In the year1: 200 mmcfd gas would be received whereas in year 2-15, 400 mmcfd gas would be received. Initially 2/3rd and 1/3rd gas was allocated to SNGPL and SSGC but now it has been agreed that SNGPL will take the entire volume in year-1.

PSO will sell all of LNG to SNGPL. SSGC on behalf of SNGPL will receive, regasify and transport/swap RLNG to SNGPL system. Further details of the transaction are under finalization stage forming part of tripartite agreement between PSO, SSGC and SNGPL.

PSO is the main importer of LNG Cargoes designated by GoP, however Private parties in Fertilizer/CNG sector have also been allowed by GoP to import their cargoes through PSO. Pak Arab Fertilizer Limited (PFL) has so far imported 4 cargoes including the commissioning cargo. However, the invoicing issues to these parties remains to be settled e.g. PFL is the customer of SNGPL and the cargoes brought by it have been re-gasified by and to be charged by SSGC.

In the initial phase, SNGPL allocation is being delivered through swap of SSGC share of indigenous gas in lieu of RLNG. In phase-I of the RLNG project (in Year 2 of RLNG operations) 400 mmcfd gas is required to be delivered to SNGPL under swap arrangements. Accordingly, from July to December 2016; 24"-33km Tando Adam Massu loopline, 42"-20 km Nara Sawan segments and compression at Nawabshah is being used to transport volume from RLNG-1. Whereas in phase-II from January 2017; 42" dia-342km Pak Land ~ Sawan pipeline of 1.2 BCF capacity from Karachi to Sawan and additional compression has been planned to deliver RLNG directly from Karachi to SNGPL network at Sawan. SNGPL initiated expansion in their network beyond Sawan.

SSGC's Transmission department can handle a maximum capacity of Indigenous Gas SWAP of 400 mmcfd (conditions permitting) having average BTU of 970 targeted for swap.

In this way, the RLNG volume should be equivalent of energy (400 X 970 = 388,000).

The imported RLNG BTU value varies from 1010 to 1100 (based on historical data).

Similarly LNG volume for 1100 BTU LNG would be " $400 \times 970 = 388,000$ / 1100 = 352.7 mmcfd of RLNG"

The Authority has issued a LNG Price determination on 7 October 2015, which has been debated by all stake holders and review petitions have been filed by them. SSGC has also filed a review petition dated: 19 October 2015. Hearings by the Authority on these petitions were made in Karachi on 28 Dec 2015 and in Lahore on 4 Jan 2016. The final outcome of the same are awaited.

Submissions made by SSGC during the proceedings have been re-iterated as under:

- LSA charges on actual basis including charges due to under utilization of capacity, if any in the RLNG price retrospectively instead of allowing provisional levelised tariff of US\$ 0.66 / MMBTU.
- > Other LSA charges on actual basis in the RLNG price as and when incurred.
- > Retainage based on applicable clause 20 of the LSA in the RLNG price.
- > SSGC cost of Service with particular reference to section 6(2) (j) of OGRA Ordinance read with Rule 20(xx) of NGRA licensing Rules 2002.
- > SSGC's administrative margin in the RLNG price in line with the approval of ECC.
- Need to devise mechanism for recovery of all charges under LSA from SNGPL and for private parties bringing their own cargoes e.g. Pak Arab Fertilizer (PFL).

The details of the Project with respect to technical/cost data, need analysis, etc. is given in Section D at D-1 of the instant petition.

In its decision on estimated revenue requirement for FY 2015-16 OGRA not allowed the return on assets related to RLNG infrastructure advising to finance these assets from GIDC. However Ministry of Finance subsequently clarified that GIDC act allows the Federal Government to decide about the utilization of GIDC hence FG has decided not to utilize GIDC for RLNG projects advising that its financing may be arranged through commercial banks as per earlier decision of ECC.

26

All the costs related to LNG/RLNG business (including the LSA and other charges) are to be ring-fenced and recovered from RLNG customers. Besides above as per the recent decision of ECC financial cost incurred in creation of RLNG infrastructure has been allowed as admissible expense in the revenue requirement of the utility companies. Estimates for FY 2016-17 related to RLNG business are therefore outlined separately under attachment I of Annexure-D.

D) Gas availability

SSGC will continue to operate as a going concern, buying natural gas in bulk from the exploration & production companies, transmitting it to consumption centres through its high pressure transmission system, and supplying to end users through its distribution network.

The gas availability from new/expected indigenous gas field during FY 2016-17 is mentioned below:

Gas Field (expected)	(MMCFD)	Starting Dates
Jhal Magsi	7.5	Jan – 17 (7.5 MMCFD)

The gas availability of 485,360 MMCF or 1,330 MMCFD for FY 2016-17 has been worked out considering take and pay and current trend of gas off takes from existing and new gas fields and it is envisaged that it will increase by 1.9% over current year estimates of 476,473 MMCF or 1,302 MMCFD and 11.6% increase over last year actual of 434,779 MMCF or 1,191 MMCFD.

E) Cost of Gas

The cost of gas purchased is based on projected wellhead gas prices effective July 2016 worked out on estimated average C&F price for crude oil at **US\$** 33.67 per barrel and HSFO **US\$** 158.11 per metric ton.

Actual monthly average rates of HSFO and Crude oil up to 7 March 2016 have been taken; 7 March 2016 prices have been used from 7 March 2016 onwards without any variation/escalation.

Rupee v/s US\$ parity has been assumed at Rs. 109 & 111 for Jul.-Dec. 2016 and Jan-Jun 2017. It has been assumed that exchange rates will remain within above figures for payments therefore exchange gain/loss is not appearing in the petition. However, the Petition may be amended for any further fluctuation in the forex rates.

Projected weighted average cost of Gas has thus been worked out at Rs. 274.31 per MMBTU for FY 2016-17 as compared to cost of gas included in DERR estimates of Rs. 302.15 per MMBTU for FY 2015-16.

F) Un-accounted For Gas (UFG)

In its determination dated 15 September 2009 on FRR for FY 2008-09 under paragraph 8.2.11 the Authority for the first time and subsequently in various determinations showed its intention to undertake a comprehensive impact assessment study of the UFG benchmarks introduced by it and change in the benchmark was intended to be considered on the completion of the said study.

In the Determination of Final Revenue Requirement (DFRR) for FY 2009-10 dated 15 September 2010 concurring to the submissions of SSGC, realizing the ground realities and considering the factors affecting UFG the Authority allowed UFG at 7%.

The Honourable High Court of Sindh granted stay on SSGC requests against OGRA determinations for ERR FY 2010-11, FY 2011-12, FY 2012-13, FY 2013-14 and FY 2014-15 and FRR FY 2012-13, FY 2013-14 and FY 2014-15 and directed OGRA to allow the same treatment for UFG in line with DFRR FY 2009-10 till court further orders and submission of the impact assessment study. Consequently, in its determinations on estimated and final revenue requirements the Authority allowed UFG benchmark at 7%. For FY 2014-15, in addition to the allowance of UFG Benchmark at 7%, the Honourable High Court of Sindh has suspended the determination of OGRA relating to UFG disallowance over and above the limits prescribed in Rule 20 of Natural Gas Tariff Rules 2002 i.e. Rs. 750 million.

The Authority previously appointed TMRC as their UFG consultants and rejected their report. We understand that OGRA is again in the process of hiring UFG consultants for UFG study to finalize the UFG targets keeping in view the applicable license conditions(s) under consultation with the stakeholders.

The final outcome on the UFG Benchmarks is still awaited. We understand that the Authority will decide the UFG benchmark in the light of all relevant factors which have been submitted before the Authority in earlier petitions/hearings; those were also considered and acknowledged by OGRA in its determination for Final Revenue Requirement for FY 2009-10.

The ECC approved Policy guidelines which were issued under Case No. ECC-154/25/2014 dated 20 Nov. 2014 in which following were allowed:

- Volume pilfered by non-consumers but detected and determined by the Companies in accordance with OGRA procedure as provided in Rule 30 of Natural Gas Licensing Rules, 2002.
- Volume consumed in law and order affected areas
- Impact of change in Bulk Retail Ratio on UFG using the base year as 2003-04.

2

Accordingly SSGC in its instant petition has claimed following items in relation to UFG:

- Pilfered volume detected against non-consumers (8,000 mmcf)
- Unbilled Pilfered volume in law & order affected areas (2,355 mmcf)
- Impact of change in Bulk-retail ratio on UFG (25,759 mmcf).

Since, no UFG targets for FY 2016-17 are available, we request the Authority to allow 7.63% UFG for FY 2016-17.

SSGC had been pleading with the Authority on the issue of fixing realistic Benchmarks. The Authority will be finalizing the UFG Benchmarks for FY 2016-17 in due course of time. We trust that for FY 2016-17 the benchmarks will be finalized strictly in the light of relevant provisions of OGRA Ordinance 2002, licensing and tariff rules and our submissions as given below:

The process of "benchmarking" has to be undertaken by the Authority under Rule 17 (1) (c) read with Condition 21 of the Petitioners' License. Rule 17 (1) (c) states:

"tariffs should include a mechanism to allow licensees a benefit from and <u>penalties for failure to achieve</u>, <u>benchmarks</u> set by the Authority <u>through yardstick regulation</u> for, inter-alia and without limiting the generality of such regulation, capacity utilization, operation and maintenance costs and <u>unaccounted for natural gas</u>;"

The mechanism required to be put in place by the aforementioned Rule for setting benchmarks has been provided for in the SSGC's License, Condition 21.1 whereof states that:

"21.1.The Licensee shall take all possible steps to keep UFG within acceptable limits. The Authority for this purpose, in consultation with Licensee and experts, shall fix target of UFG for each financial year. The Authority may fix UFG target separately for each regulated activity."

As per Condition 21.1, three steps are required to be taken before setting a UFG benchmark.

- i) consultation with the Licensee
- ii) consultation with experts, and
- iii) annual determination of the benchmark.

The above license condition emphasises that benchmarks should be set after going through a consultative process not only with the licensee alone but also with experts, and the consultation should be meaningful. The condition also requires fixation of targets each year. One could easily

understand that when the targets are determined for each year in consultation with the licensee and experts these would eventually reflect appropriate ground realities/circumstances under which the targets are determined.

As regards to penalization for not achieving the targets we would like to submit as under:

The OGRA Ordinance under Section 6 (2 (p) authorizes OGRA to (by Rules) fine for contravention of the Ordinance, rules, regulation, terms and conditions of the license and the decisions of the Authority.

Penalty as mentioned above has been specifically prescribed by OGRA in Rule 20 of the Natural Gas (Tariff) Rules 2002 which lays down that a maximum of Rs. 2 million per day for a continuing breach totalling Rs. 752 Million for a financial year may be imposed. Rule 20 is clearly all encompassing in that all violations of the statute, rules, regulations, license, as well as orders, determinations, instructions etc issued by the Authority, i.e. OGRA, are covered by it.

Notwithstanding to the above we understand that inability to meet benchmarks is not a deliberate violation of the decisions of the Authority etc, before making any disallowance / imposing penalty OGRA has to determine whether, and to what extent, should the Petitioner be penalized if the benchmark has not been met. Since the Rule envisages imposition of penalty, it is settled law that OGRA must: i. ask the licensee to show cause why penalty should not be imposed; ii. apply its mind to the arguments/response presented by the licensee; iii. determine whether there was any wilful or preventable default on part of the licensee; iv. determine whether there was violation of a law; v. use a standard of proof of "beyond reasonable doubt" (as penal provisions are quasi-criminal in nature); and vi. apply the principle of proportionality, it is submitted that to date OGRA has penalized the Company in respect to UFG losses by forcing to bear the cost of the UFG that is over and above the "benchmark" set by it, and the amounts so adjusted from revenue requirements are far more than the amount that has been prescribed for violation of statutory provisions.

In addition to it we would like to refer **Section 7 - Tariff** and **Section 8 - Pricing for retail consumers for natural gas** (reproduced below) of OGRA Ordinance:

Sec 7: The criteria for determination, approval, modification and revision of tariffs shall be prescribed in the rules and in the terms and conditions of each licence and shall, inter alia, include ---

provision of reasonable returns to attract investment of the quantitative and qualitative improvements of regulated activities

Sec 8: 6(h) "Total revenue requirement" means for each financial year, that total amount of revenue determined by the Authority for each licensee for

natural gas so as to ensure it achieves the rate of return provided in its licence for natural gas.

The above provisions of the OGRA Ordinance obligates the Authority to safeguard the reasonable return (17% in case of SSGC) to the licensee, which is not the case here and historic disallowances in case of UFG only has heavily eroded this guaranteed return.

In view of the discussions and in the light of the legal provisions referred above, any disallowance/penalty imposed by OGRA for not meeting the UFG target over and above what has been prescribed in Rule 20 on Natural Gas Tariff Rules 2002 is unlawful and the same has been confirmed by Sindh High Court Stay Order dated: 17.7.14 against OGRA decision dated: 3 July 2014 on ERR FY 2014-15.

Relevant extracts from the interim relief granted by SHC are as under:

"..Till next date of hearing, same interim orders as already passed for the years 2010-11, 2011-12, 2012-13 and 2013-14 in petitions bearing OGRA J.M.Nos. 01/2011, 02/2011, 01/2012 and 01/2013 are extended to the present Petitioner for the year 2014-15 and the order to the extent of UFG disallowance passed by the Respondent No. 1, which is contrary to Rule 20 of the Natural Gas Tariff Rules, 2002, is suspended till next day of hearing".

(Emphasis added)

The Authority has not yet implemented the above referred decision of the Honorable Sindh High Court in its determinations issued for FRR FY 2014-15 and the Company reserves the right to proceed further seeking legal course of action for implementation of the High Court's order.

The revenue requirement is therefore based on UFG of 7.63%, however, keeping in view of Rule 20 (I) of Natural Gas Tariff Rules 2002, the disallowance has been restricted to Rs. 750 million.

We would, therefore, request the Authority to allow SSGC's justified UFG claim in the instant Petition.

G) Operating costs:

i) HR cost Benchmark:

The HR benchmark (based on OGRA's in-house developed formula) implemented by the Authority vide its determination on ERR FY 2014-15 dated: 3 July 2014 has expired in FY 2014-15, however the same has been extended by the Authority on provisional basis for FY 2015-16. The Company requested estimated HR cost of Rs. 12,133, whereas OGRA allowed only Rs. 10,628 million (including IAS-19 provision of Rs. 468 million), by applying a revised formula as mentioned above based on Rolling base year taking immediately preceding year's bench mark cost as base cost, Cost of TA's made part of bench mark (earlier it was a pass through cost), all HR related costs including CBA, bonuses etc except IAS

19 provision have been made part of bench mark; Weight age for no. of customers, Network size and Sales volume has been changed from 60:20:20 to 65:10:25.

The revised formula grossly failed to cater SSGC's genuine needs for appropriate HR compensation. As a consequence Authority in its FRR Determinations for 3 years i.e. FY 2012-13, FY 2013-14 and FY 2014-15 had made a disallowance of Rs 893 million. This point has also been contested by the Company in its Motion for Review Petitions against Authority's said determinations.

The Company has been contesting with the Authority since long to allow benchmark cost based on rolling base year concept. In its revised formula the Authority finally in principle has accepted the rolling base year concept. Although last year's benchmark cost being treated as base year cost, the Authority has somewhat realized and compensated the need of rolling base year but the Company has been requesting that the last year's actual cost be made the base year's cost in order to meet the genuine HR demands.

Since introduction of HR benchmarks, the cost of Temporary Assignees had been treated as a pass through cost i.e. outside the benchmark formula since this factor is beyond the control of the Company.

In para no. 8.1.4 of its determination for Review of ERR FY 2005-06 dated: 19 October 2005 the Authority noted that the Company has argued that the cost of TAs inducted through Supreme Court Order be kept outside the scope of HR benchmark as this is a factor / financial impact of which is beyond the control of the company. The Authority acknowledged the same and allowed the cost of TA's outside HR benchmark.

Similarly, in its determination for ERR FY 2010-11 dated: 18 May 2010 para 9.3.34 to 9.3.36 the Authority has mentioned that the Company has claimed TA's cost for the said year (re-instated through Presidential Ordinance 2009) over and above the HR benchmark and has allowed the same subject to provision of quarterly reports by the Company which are being regularly submitted to the Authority. The arrears relating to TAs for previous periods have also been allowed over and above Benchmark cost in Authority's determination FRR FY 2009-10 dated: 24 Sep 2010. Making TA's cost as a part of benchmark cost is a shift from the previously agreed position between Licensees and OGRA to the utter disadvantage of the Company.

Allowance of 100% impact of CPI has also not been admitted though it is specifically mentioned previously that Statistical Bureau of Pakistan changed base year for calculation of Inflation Rate to 2007-08 otherwise inflation rate would have been much higher.

Therefore, keeping in view inflationary trends, increased average age per employee, rising medical cost of the company, reducing buying power of

employees it is necessary to compensate the employees meeting the impact of inflationary trends.

Since there is no valid basis available to work out the benchmark cost for FY 2016-17; HR cost amounting Rs. 13,021 million (HR cost Rs. 8,723 million + IAS-19 Provision & TAs impact Rs. 4,298 million) has been claimed in the instant petition. This claimed estimated cost is only 8.7% increase per annum over and above the actual cost of Rs. 11,076 million for FY 2014-15.

Any revision in the HR cost based on new formula may be applied subsequently and adjusted in the revenue requirement petition.

- **ii) Gas Consumed Internally:** Calculated on the basis of estimated volumes of gas internal consumption for FY 2016-17 valued at WACOG of indigenous gas at Rs. 274.31 per MMBTU.
- **iii) Provision for Doubtful Debts:** The Company's estimates of Rs. 2,344 million have been claimed under this head being 1% provisioning under ECC Guideline dated: 20 Nov 2014.
- **iv) Other operating Costs:** Other T&D cost estimates are primarily based on best estimates keeping in view the increase in prices owing to inflation, activity and rates. Provisions for extra-ordinary and unusual revenue expenditure and increase due to enhanced activity have also been incorporated.

H) Addition to Rate base / Physical Targets

During FY 2016-17 the Company plans to capitalize Rs. 74.3 billion (excluding LPG Airmix) which facilitates expansion in transmission system by 623 km and distribution network mains and services by 1,187 km This includes new towns and villages 185 Km and 34 Km for major distribution projects. Besides this rehabilitation of 1,213 Km has been envisaged for UFG control programme. Acquisition of other assets with the objective to meet growing demand of natural gas and maintain / improve quality of service in the franchise area has also been envisaged. Gas will be provided to about 104,367 new connections, thereby total no of customers are expected to be around 2.9 million.

UFG Control Programme

The company is no longer continuing with NGEP program under the World Bank because of various reasons and requested MPNR to advice EAD for intimating World Bank (copy enclosed). However, same activities will be continued by respective departments to control UFG.

The Board and Management are focusing to install bulk meters on all TBS/PRS, create isolated segments and manage the small business units more effectively.

The segmentation guidelines have been developed for both regions South and North on same criteria and a comprehensive plan is being reviewed by Distribution Departments.

The target for rehabilitation of old leaking pipelines have been reduced because of previous progress on the approved schemes, dependent on road cutting approvals from local Government.

The Management realize the importance of Cathodic Protection as proactive approach in controlling UFG, new CP stations are being added in the system and its cost is also included under ERR.

Air Mix LPG Projects:

The concept of installation of Air Mix LPG project was found feasible in the remotely located areas where extension of gas transmission / distribution network is difficult and economically unviable. Owing to the directives / approvals of GOP four such projects have been executed in Gawader, Noshki, Kot Ghulam Muhammad and Surab.

Brief details of the proposed new LPG Air mix plants for FY 2016-17 are given in the table as under:

LPG Air Mix Projects	Province	Cost Rs. Million	Expected Completion

Physical targets:

As a result of the addition in rate base, the company will be able to achieve the Physical targets as contained in Attachment-II.
